Writing

Write an essay about good and bad points of using mobile phones.

You have to write 180-200 words. Time:

45 minutes

Mobile phones are an important part of our life. We use them everywhere: at school, at home, at work when spending time outdoors. And of course all gadgets have their good and bad points, mobile phones have them too.

Mobile phones have a lot of good points. For example, communication with somebody, even if you are far away from each other. Another one good point is that you have an access to a lot of different information like magazines, news, biographies of famous people etc. Also mobile phones' software includes alarm clock, music player, weather forecast, clock, which make life easier.

One of the biggest bad points of mobile phones is that they give off a radiation and killing their users. Another one bad point is that some people stop realize real life and always using mobile phones, they think that life is boring.

I like to use my mobile phone. I think it's a cool and good gadget device, that makes my life easier. So, I think, that mobile phones are good and helpful devices, but we need to control our virtual activities and real life, try to balance them.
